Forecast for Thursday 26 May 2022

Weather: Area of light to moderate rain spreading from the west towards dawn, which linger through much of the morning, before clearing to east from around mid-day, leaving an afternoon of sunshine and only a few light and isolated rain showers.

Chance of cloud-free hill tops above 800m: 10-20% for the morning, becoming 90% for the afternoon

Low cloud and visibility: Good or very good, becoming moderate or poor in early rain, perhaps sporadically in later showers, very poor within cloud as bases extensive from 300-500m in early rain, infrequently from 600m in later showers.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Hill fog quite extensive during the morning, combining with driving rain and across higher peaks gales to bring some difficult conditions. Risk of sunburn in strengthening afternoon sunshine.

Forecast for Friday 27 May 2022

Weather: Mainly dry with plentiful sunshine and only a few light and very isolated showers appearing.

Maximum wind: West to northwest initially mean 30-35mph with gusts reaching 45mph over most exposed ridges and summits, gradually easing through the day.

Chance of cloud-free hill tops above 800m: 95% plus.

Low cloud and visibility: Good or very good, potentially moderate at times in showers, very poor within cloud as bases sporadically lower 600m as showers push through.

Temperature: **Valleys:** Plus 6 Celsius increasing 16 Celsius for the afternoon
At 800m: Plus 4 Celsius increasing 8 Celsius for a time
Freezing level: 1200m increasing 1500m for a time
